CLOSER TO RALLY.

1. WELCOME AND INTRODUCTION

Welcome to the 66th edition of Rally Sweden!

The rally will take place 15 - 18 February in the region of Värmland and like previous years a visit to the neighbouring country Norway will be made.

Locations

The service park as well as the overnight parc ferme will be at the airport in Torsby. New location for Rally HQ is Hotel Selma Spa in Sunne, app 35 km south from the Service Park in Torsby.

Route

The total length of the route is 1398,05 km and the special stage length is 314,51 km. 23,9 % of the special stages kilometres are new compared to last year. A comparison with previous years is enclosed in Appendix 1 together with the itinerary.

After the shakedown stage on Thursday morning 15 February, the start of the rally and SSS 1 will take place in Karlstad on Thursday evening.

On Friday the rally will, in addition to the stage Torsby, visit Norway and the stages Hof-Finnskog, Svullrya and Rödjen (with parts of the stage in Sweden).

The classic stage Vargåsen with the famous Colin's Crest will together with Hagfors and Torntorp form the competitive sections of Saturday. The day will end with a second run on the Superspecial stage in Karlstad as well a short sprint stage in Torsby.

On Sunday the stage Likenäsa is repeated twice, and the stage Torsby will be the final stage of the rally as well as power stage.

Rally Sweden Historic

A rally with classic cars will take place on Friday and Saturday in conjunction to the WRC rally.

A warm welcome to a magic winter rally week in Sweden and Norway!

FIA Environment accreditation

Rally Sweden has become the one of the first motor sport event in the world to achieve the accreditation "Achievement of Excellence" from the FIA Institute's environment programme. The framework forms part of a broader initiative between the FIA and the FIA Institute aimed at evaluating and reducing the environmental impact of motor sport.

One important factor is the number of print-outs made from various documents. Rally Guide 1 og 2 as well as the Supplementary Regulations will only be published on the event website.

We would appreciate all competitors joining us for this management by informing us early the number of Road Books and other printed documents they need (should be less than the regulatory package), so we do not end up throwing a lot of unused materials to recycling.

THIS DOCUMENT HAS NO REGULATORY POWER - FOR INFORMATION ONLY!

9. HELICOPTERS AND DRONES

9.1 HELICOPTERS

The Swedish Transport Agency, Civil Aviation Department, has declared the airspace above the rally area as "Restricted Area". Only helicopters registered with the organizer and following the instructions of the Swedish Transport Agency and the organizer, are allowed to operate in this area.

Note! All foreign Aerial Work operators have to obtain permission for flying in Sweden from the Swedish Transport Agency. For further information please contact:

Swedish Transport Agency Civil Aviation Department:
Phone: +46 (0)771 503 503, e-mail: luftfart@transportstyrelsen.se

For safety reasons, the number of helicopters operating in the area will be limited to 30. In addition, briefing for all pilots is mandatory and at the briefing you will receive an information manual containing time tables, maps and information about the Service Park, the special stages, GPS coordinates, refuel information, radio frequencies to be used etc. An administrative fee of 2 000 SEK (excl. VAT) will be charged for this service.

The Registration form will be published on www.rallysweden.com in due time. It will also be sent on request, e-mail to: mailbox@rallysweden.com. The form has to be submitted to the event Helicopter Coordinator on February 2 at the latest.

Amendments for operations in Norway.

According to regulations a Flight Plan has to be submitted before crossing the border between Sweden and Norway. Due to poor low altitude radio coverage in the area a phone number for closing and opening of Flight Plans will be issued in the information manual.

Information regarding custom clearance before landing in Norway will be given later.

Application for "Restricted Area" has been submitted to the Civil Aviation Authority in Norway.

Information about approval will be given in the information manual. Radio frequency for use in Norway will be issued in the information manual.

Climate

Given Norway's extreme northerly position, its mainland climate is surprisingly mild. Norway is the northernmost country in the world to have open waters. This is due to the trade winds forced across the Atlantic Ocean by the American continent and the warm currents (known as the Gulf Stream) flowing north from the Equator towards the Norwegian Sea. The lowest minimum temperature recorded is -51 °C in Karasjøen - Karasjøen in northern Norway. Winter season is from November to March with January and February as the coldest months of the year, normally with temperatures below zero degrees Celsius.

RALLY SWEDEN ENVIRONMENTAL POLICY

CLOSER TO RALLY.

As one of Sweden's largest spectator event Rally Sweden shall be a leader and good example in environmental work both nationally and internationally. We will profile Rally Sweden as an organizer that puts the environment in all areas all year round, even if the rally takes place in the winter. We want the entire organization to be engaged in environmental work and that each employee and marshal takes environmental considerations into the decisions taken. Successively Rally Sweden through conscious choice will work for the environmental impact to be reduced and we will:

- o Commit to continuously improve our environmental work.
- o Define clear goals and frameworks for our environmental work.
- o Educate and inform as many people as possible both within the organisation and externally of our environmental policy.
- o Comply with relevant environmental laws and regulations, and other environmental requirements as well as the FIA Institute Environmental Certification Framework.
- o Strengthen our focus on specific aspects of our environmental work regularly through structured and planned work within:
- o Seeking cooperation and knowledge exchange with environmental operators to ensure high level quality of our environmental work.
- o Observing environmental work and environmental impact when we choose partners and suppliers and strive to choose products and services with proven good environmental performance.
- o Seeking to limit our transports' environmental impact as much as possible.
- o Saving energy and use renewable energy sources where possible, minimize waste, recycle and energy recycle.
