RALLY GUIDE 2

CLOSER TO RALLY.

RALLY SWEDEN ENVIRONMENTAL POLICY

As one of Sweden's largest spectator event, Rally Sweden shall be a leader and good example in environmental work both nationally and internationally. We will profile Rally Sweden as an organizer that puts the environment in all areas all year round, even if the rally takes place in the winter. We want the entire organization to be engaged in environmental work and that each employee and marshal takes environmental considerations into the decisions taken. Successively Rally Sweden through conscious choice will work for the environmental impact to be reduced and we will:

- **Commit to continuously improve our environmental work.**
- **Define clear goals and frameworks for our environmental work.**
- **Educate and inform as many people as possible both within the organisation and externally of our environmental policy.**
- **Comply with relevant environmental laws and regulations, and other environmental requirements as well as the FIA Institute Environmental Certification Framework.**
- **Strengthen our focus on specific aspects of our environmental work regularly through structured and planned work within:**
 - **Seeking cooperation and knowledge exchange with environmental operators to ensure high level quality of our environmental work.**
 - **Observing environmental work and environmental impact when we choose partners and suppliers and strive to choose products and services with proven good environmental performance.**
 - **Seeking to limit our transports' environmental impact as much as possible.**
 - **Saving energy and use renewable energy sources where possible, minimize waste, recycle and energy recycle.**

FIA Environment accreditation

Rally Sweden has become the first motor sport event in the world to achieve accreditation from the FIA Institute's environment programme. The framework forms part of a broader initiative between the FIA and the FIA Institute aimed at evaluating and reducing the environmental impact of motor sport.

One important factor is the number of print-outs made from various documents. Rally Guide 1 and 2 as well as the Supplementary Regulations will only be published on the event website.

We would appreciate all competitors joining us for this management by informing us early the number of Road Books they need (should be less than the regulatory package), so we do not end up throwing a lot of unused materials to recycling.

19. MEDICAL AND SAFETY SERVICE

Medical information for Sweden and Norway

Citizens from the EU/EEA - countries will receive emergency medical care paying the same patient charge as Norwegian and Swedish citizens. Competitors from these countries must provide an E 111 form, EU card or corresponding document verifying that the person is covered by health insurance, when medical care is required, and should obtain this form before leaving their home country. Citizens from the Nordic countries are not required to provide the E 111 form.

Besides the EU/EEA-countries Sweden and Norway has an agreement with the following countries which guarantees the citizens emergency medical care at the same patient charge as Norwegian and Swedish citizens: Algeria and Australia. Competitors from these countries must also provide an E 111 form, EU card or corresponding document verifying that the person is covered by health insurance. Citizens in other countries than mentioned above have to pay the total cost of treatment plus the patient charge.

When competing outside their countries, crews must have taken out an international insurance policy covering their repatriation, if necessary, after an accident.

Climate

Given Norway's extreme northerly position, its mainland climate is surprisingly mild. Norway is the northernmost country in the world to have open waters. This is due to the trade winds forced across the Atlantic Ocean by the American continent and the warm currents (known as the Gulf Stream) flowing north from the Equator towards the Norwegian Sea. The lowest minimum temperature recorded is -51 °C in Karjohka - Karasjok in northern Norway. Winter season is from November to March with January and February as the coldest months of the year, normally with temperatures below zero degrees Celsius.
