FIA Environment accreditation

Rally Sweden was the one of the first motor sport event in the world to achieve the accreditation “Achievement of Excellence” from the FIA Institute’s environment programme. During 2022 Rally Sweden achieved Three stars, the highest level, in the FIA’s environmental accreditation framework. Rally Sweden has thus received an important quality receipt for its environmental and climate work.

The move to Umeå meant that Rally Sweden could take several important steps towards the vision of zero emissions, Rally Towards Zero. Extensive use of fixed electricity from renewable and locally produced sources improved opportunities for visitors to get to the arenas by public transport and cooperation with several environmentally certified key suppliers were some of the environmental advances.

One factor is the number of print-outs made from various documents. Rally Guide 1 og 2 as well as the Supplementary Regulations will only be published on the event website.

We would appreciate all competitors joining us for this management by informing us early the number of Road Books needed (should be less than the regulatory package), so we do not end up throwing a lot of unused documents to recycling.

As one of Sweden’s largest spectator event Rally Sweden shall be a leader and good example in environmental work both nationally and internationally. We will profile Rally Sweden as an organizer that puts the environment in all areas all year round, even if the rally takes place in the winter. We want the entire organization to be engaged in environmental work and that each employee and marshal takes environmental considerations into the decisions taken.

Successively Rally Sweden through conscious choice will work for the environmental impact to be reduced and we will:

- o Commit to continuously improve our environmental work.
- o Define clear goals and frameworks for our environmental work.
- o Educate and inform as many people as possible both within the organisation and externally of our environmental policy.
- o Comply with relevant environmental laws and regulations, and other environmental requirements as well as the FIA Institute Environmental Certification Framework.
- o Strengthen our focus on specific aspects of our environmental work regularly through structured and planned work within:
- o Seeking cooperation and knowledge exchange with environmental operators to ensure high level quality of our environmental work.
- o Observing environmental work and environmental impact when we choose partners and suppliers and strive to choose products and services with proven good environmental performance.
- o Seeking to limit our transports’ environmental impact as much as possible.
- o Saving energy and use renewable energy sources where possible, minimize waste, recycle and energy recycle.
