FIA ENVIRONMENT ACCREDITATION

Rally Sweden was one of the first motor sports events in the world to achieve the accreditation "Achievement of Excellence" from the FIA Institute's environment programme. During 2022 Rally Sweden achieved Three stars, the highest level, in the FIA's environmental accreditation framework. The FIA onsite audit during the 2024 event resulted in the event maintaining the same level. Rally Sweden has thus received and maintained an important quality receipt for its environmental and climate work.

Rally Sweden have taken several important steps towards the vision of zero emissions, Rally Towards Zero. Extensive use of fixed electricity from renewable and locally produced sources, along with improved opportunities for visitors to get to the arenas by public transport, and cooperation with several environmentally certified key suppliers, are some of the environmental advances.

One factor is the number of printouts made from various documents. Rally Guide 1 and 2 as well as the Supplementary Regulations will only be published on the event website.

We would appreciate all competitors joining us for this management by informing us early the number of Road Books needed (should be less than the regulatory package), so we do not end up throwing a lot of unused documents to recycling.

RALLY SWEDEN ENVIRONMENTAL POLICY

Rally Sweden wants to be the world's most sustainable rally – both economically, socially, and environmentally.

Our mission is to be driving and inspiring, towards both other global motor events and the event world in general. We do this by:

- Adhering to applicable legislation
- Protecting the environment, for example:
 - Phasing out fossil materials & plastics
 - Accelerating the transition to fossil-free fuels and renewable electricity
 - Reducing waste
 - Decreasing emissions associated with the event
 - Promoting biodiversity
- Consistently creating a strong, engaging, and sustainable experience for the audience
- Being an attractive partner for companies aiming to drive development and influence the world towards new, more sustainable solutions.

The vision is a carbon-neutral Rally Sweden, and we call it "Rally Towards Zero." To achieve this, we work with three focus areas:

- Zero fossil materials and plastic
- Zero fossil fuels and emissions
- Zero waste left in nature

In relation to the audience, the concept "Leave nothing or no one behind" is communicated, aiming to encourage responsibility for both personal and others' safety, as well as leaving nature in the same condition as before the event.

1. WELCOME AND INTRODUCTION

It is our honour to welcome you to Sweden and the 72nd edition of Rally Sweden!

5.11.1. Best practices

Oil drums are properly secured, and the ground is protected by two layers of spill covers.

Waste drums for fluids are properly labelled.

5.11.2. Things to avoid

Inadequate protection against ground pollution in case of spills.

Spill trays under fuel drum and generator are not in place.

Washing of car parts over open ground without proper ground protection.

These types of mats need to have a second layer underneath to catch fluids running through the holes.

Usage of paint/chemicals next to open ground/water source.

Loose bin bags are unlabelled, prone to falling over, and spilling garbage.
